DETAILED ACTION

Claim Objections

Claim 3 is objected to because of the following informalities:

In claim 3, line 2, "a rotor hub assembly" should be --the rotor hub assembly--.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Swank (5,484,268).

In figures 1-6, Swank teaches a hydraulic pressure system comprising: a support structure 12, 12', 112 defined along an axis (inherently); a hydraulic pump comprising a pump body 14, 14', 114 and a pump shaft 32, 132; said pump body 14, 14', 114 mounted within said support structure 12, 12', 112 for rotation relative said pump shaft 32, 132, wherein said support structure comprises a flanged cylinder (not numbered) mounted to a rotor hub assembly 44, 42, 144, 142.

Allowable Subject Matter

Claims 7-20 are allowed.

Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consist of three patents.

Peterson (2,703,147) is cited to show a hydraulic pressure system for a rotor hub having a hydraulic pump but fails to show pump body mounted within support structure for rotation relative a pump shaft.

Gates (3,762,276) is cited to show an assembly having a body mounted within support structure for rotation relative to a shaft but fails to show the body being a pump body.

Schreiber (6,109,876) is cited to show a hydraulic system for a rotor hub assembly having a support structure, a hydraulic pump having a pump body mounted for rotation but fails to teach a pump shaft.
